

# Social & Labor Convergence Program (SLCP)

*Converged Assessment. Collaborative Action.  
Improved Working Conditions.*

SLCP Data Quality & Integrity Webinar  
March 2022

# Objectives

Provide stakeholders with an overview of the SLCP Verification Oversight & Quality Assurance strategy

Highlight recent & upcoming strategy developments that strengthen SLCP data quality & integrity

Share insights from VO & QA processes and findings

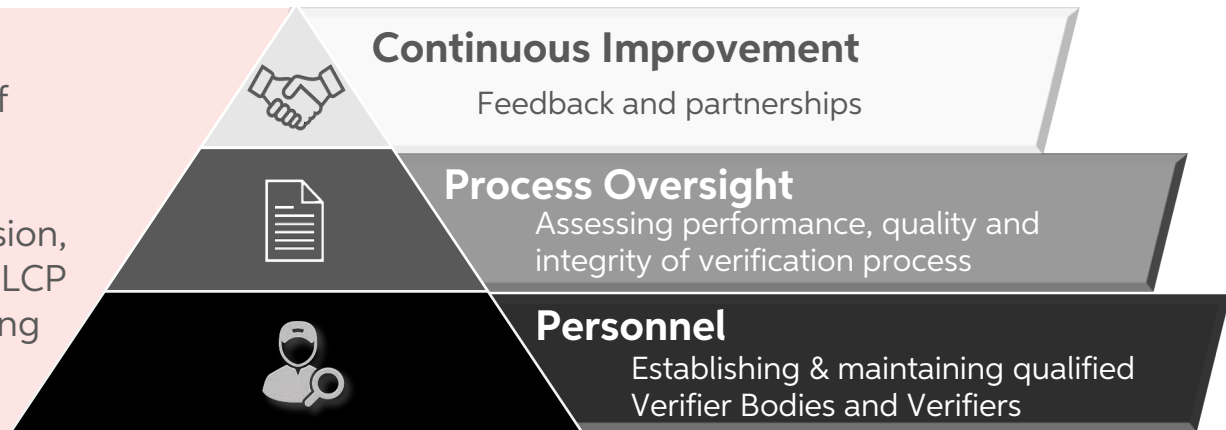

Signpost stakeholders to further information & resources

## SLCP strategy for:

# Verification Oversight & Quality Assurance

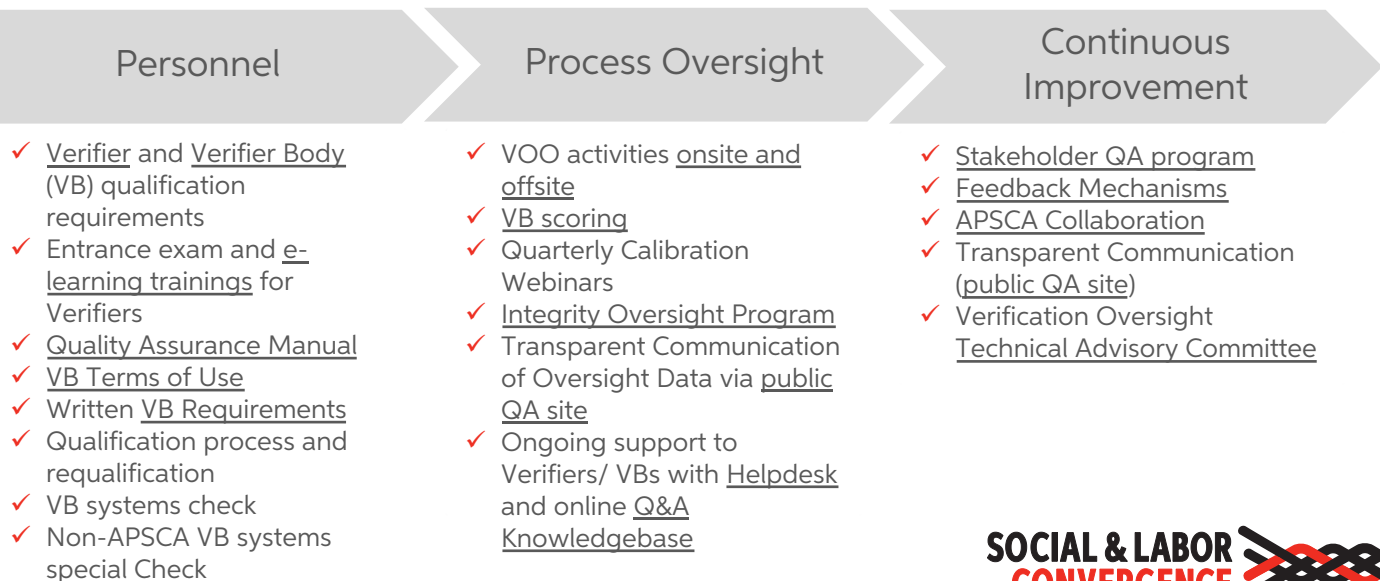

### Goal:

Build trust in and credibility of SLCP and its data through comprehensive and rigorous processes that improve precision, consistency and integrity of SLCP verifications over time, resulting in quality verified data.

## Verification Oversight Organization (VOO)

Overarching body responsible for ensuring integrity of SLCP verification and quality of verified assessment data.

# Personnel

# Personnel

## Goal:

Build trust in and credibility of SLCP and its data through comprehensive and rigorous processes that improve precision, consistency and integrity of SLCP verifications over time, resulting in quality verified data.

## Continuous Improvement

Feedback and partnerships

## Process Oversight

Assessing performance, quality and integrity of verification process

## Personnel

Establishing & maintaining qualified Verifier Bodies and Verifiers

## Verification Oversight Organization (VOO)

Overarching body responsible for ensuring integrity of SLCP verification and quality of verified assessment data.

### Personnel

- ✓ Verifier and Verifier Body (VB) qualification requirements
- ✓ Entrance exam and e-learning trainings for Verifiers
- ✓ Quality Assurance Manual
- ✓ VB Terms of Use
- ✓ Written VB Requirements
- ✓ Qualification process and requalification
- ✓ VB systems check
- ✓ Non-APSCA VB systems special Check

### Process Oversight

- ✓ VOO activities onsite and offsite
- ✓ VB scoring
- ✓ Quarterly Calibration Webinars
- ✓ Integrity Oversight Program
- ✓ Transparent Communication of Oversight Data via public QA site
- ✓ Ongoing support to Verifiers/ VBs with Helpdesk and online Q&A Knowledgebase

### Continuous Improvement

- ✓ Stakeholder QA program
- ✓ Feedback Mechanisms
- ✓ APSCA Collaboration
- ✓ Transparent Communication (public QA site)
- ✓ Verification Oversight Technical Advisory Committee

# Approval of Verifier Bodies & Verifiers

**64**  
approved  
Verifier  
Bodies

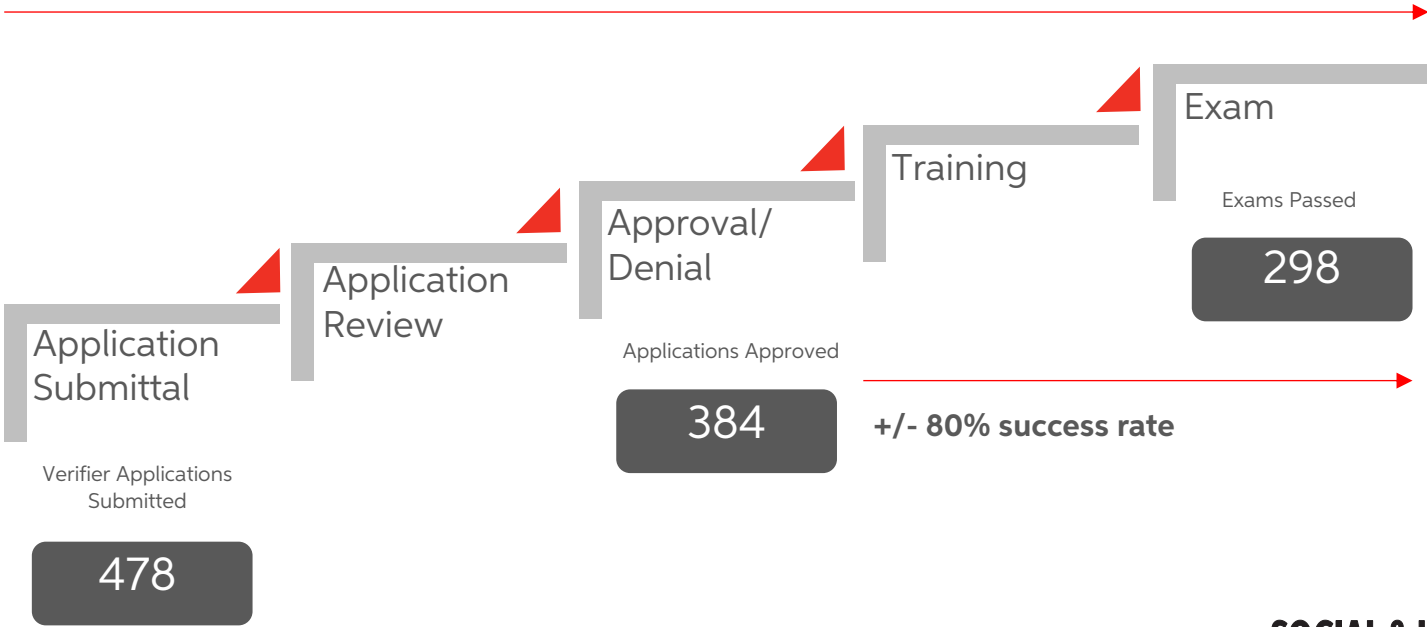

**770**  
approved  
Verifiers

**Process:**

- VBs and Verifiers must meet eligibility criteria.
- Verifiers must take e-learning and pass an exam

**Verifier Applications in 2021**      +/- 62% success rate

New:

# Clearer VB & Verifier Responsibilities

## Updates to:

- VB Terms of Use
- QA Manual
- VB Requirements Document

## Better documentation of:

- Qualification process
- How to maintain qualifications

*New:*

# Greater alignment with APSCA

**In 2021, SLCP and APSCA signed a 3-year collaboration agreement on Verifier/Verifier Body quality.**

## **Streamlined application process:**

- APSCA/Non-APSCA differentiation for VB onboarding (Provisional Status)
- Non-APSCA members need to go through additional (paid) VB management check
- APSCA certification equivalency for Verifier application approvals
- APSCA certification equivalency for maintaining SLCP approved Verifier status year over year. SLCP process aligned with APSCA Continuous Professional Development (CPD) requirements

### **Benefit for SLCP:**

Aligning with existing frameworks for audit body & auditor integrity

*New:*

# Greater alignment with APSCA

## Additionally:

- APSCA status published on [VB public list site](#)
- As per Verifier Body Terms Of Use, SLCP permitted to communicate findings of ethics and integrity investigations to APSCA

### APSCA & SLCP in 2021

- **51% of Verifier Bodies** are APSCA members
- **85% of verified assessments** were conducted by APSCA members

# Building on Success

---

## Vision

Members are trusted professionals in Social Compliance Auditing

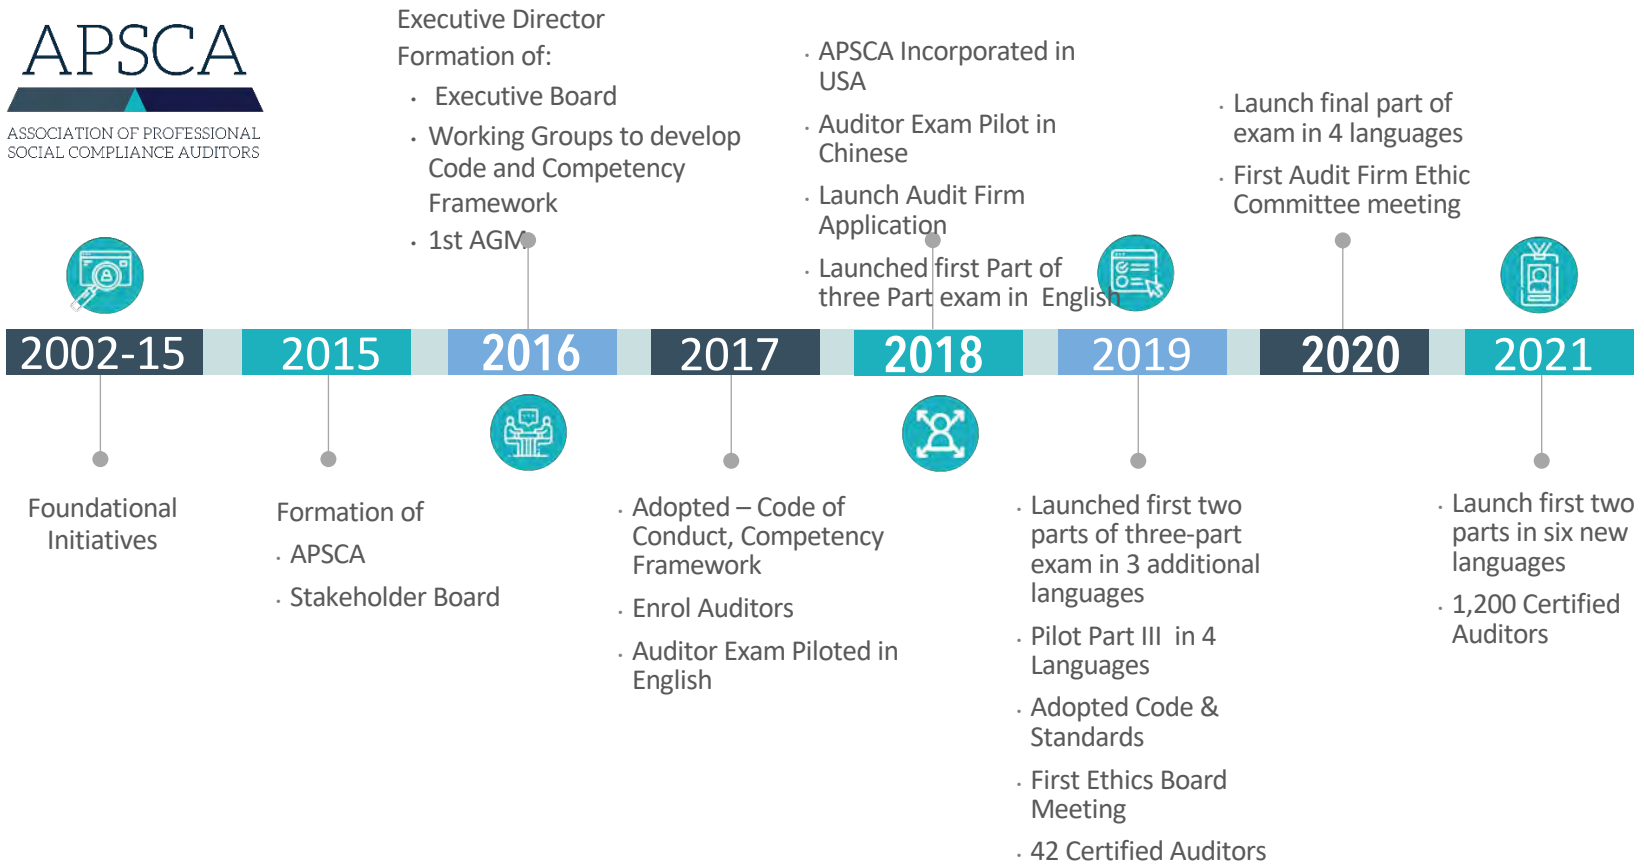

## Mission

To increase the value and effectiveness of independent social compliance audits by enhancing the **professionalism, consistency and credibility** of individuals and organizations perform them

# Ethics Team Overview and Workflow

## 1. Process Allegations/Complaints

### 2. Assess Allegations:

- ✓ Are they credible?
- ✓ Are they within our scope?
- ✓ Do they violate the APSCA Code & Standards of Professional Conduct?

### 3. Following up, we may:

- ✓ Ask Member Firms to investigate and provide us with an investigation report.
- ✓ Follow up with subjects of the allegation and other parties involved, and request additional information.
- ✓ Facilitate a third party investigation, if needed.

## 4. Present case to Disciplinary Board for Member Auditors (DBMA)

## 5. Communicate DBMA decisions to relevant parties.

# Improved comms on Verifier capacity

## Public list of Verifier Bodies

### SLCP Active Verifier Body (VB) List

#### Welcome to the SLCP Verifier Bodies List!

The table below can be used to quickly scan the active SLCP Verifier Body (VB) list. Use the search field to look for a specific country or name.

**Countries/ regions included in overview:** Note that the table shows availability of Verifiers in countries/regions both where SLCP is currently active and where SLCP will be active. Therefore, viewing a country/region on this list does not mean that verification can be completed for facilities located there. For the up-to-date list of SLCP country/region activity, please visit the [Gateway homepage](#).

Facilities can use this table to understand which VBs are active in their country/region. The list includes the contact details for each VB. Before selecting a VB for a verification, a facility should contact them to understand costs and availability. After choosing a VB, the facility can select them from a list on their Accredited Host platform. See the [SLCP FAQs for facilities](#) for more details.

**Facilities note languages spoken in your facility:** In your Gateway profile, you need to include all languages that are spoken in your facility, i.e. any languages spoken by facility management and employees. Languages are selected from a standardized list. This language information is used to match you with a Verifier that has the appropriate language skills to conduct the management and employee interviews. Make sure that one of the languages in the final column of the table below matches one language spoken in your facility before contacting a VB for a quote.

**Facilities note selecting Verifier Body:** Please be aware that the list below shows "APSCA Status" and "Approval Status". To better understand APSCA Status, please go to the APSCA website here: <https://www.theapsca.org/apsca-member-firms/> Approval statuses have the following meanings:

- **Full:** The VB is either 1) An APSCA full member or 2) non-APSCA member that has completed the VB Check from the VOO and has

[Chart of Verifiers by Country and VB](#)

If you don't see a VB with approved Verifiers in your country/region, click here to view a list of VB that are approved for additional countries/regions but don't yet have Verifiers. You can contact them to check when Verifiers might be available

[VBs Approved for Countries but No Verifiers](#)

You can view a list of countries/regions with local Verifier capacity risks by clicking this button

[View Local Verifier Capacity Risk](#)

If you know the family/last name of a Verifier and the Gateway ID you can check approval status here

[Check Verifier Status](#)

**New:**

# Improved comms on Verifier capacity

## Functionality to check the local Verifier capacity risk

### Risk Level (Local Verifiers)

Level 1 Risk (No Local Verifiers, No Pipeline, No VB)

Level 2 Risk (No Local Verifiers, No Pipeline)

Level 3 Risk - No Local Verifiers

Level 4 Risk (High Ratio)

Level 5 Risk (Within Target)

Level 6 Risk (Risk of Over Capacity)

**Disclaimer:** The below risk levels for local Verifier capacity are only indicative. Risk levels are based on current VB and Verifier capacity/pipeline and the forecasted verification numbers by country/region shared by some SSCP signatories for 2022 operations. "Local Verifier" means that the table only considers Verifiers approved for countries/regions who are located in country/region. There are Verifiers already approved and in the pipeline who are located outside the country/region they are approved for. As we want to include possible travel restrictions in our risk evaluation, these non-local Verifiers are not included in the table. Please always check with Verifier Bodies to confirm Verifier availability.

**Risk level explanation:**  
**Level 1:** At this level, we are seeking new or existing Verifier Bodies to be approved for these countries/regions and to submit Verifier candidates for approval.  
**Level 2:** At this level, we have approved Verifier Bodies, but currently are seeking Verifier candidates for approval.  
**Level 3:** At this level, we have approved Verifier Bodies and at least one eligible Verifier candidate, however, no candidates have been approved as Verifiers.  
**Level 4:** At this level, we have approved Verifiers however, based on shared projections, overall capacity is limited and we are seeking additional Verifier candidates.

Country/Region	
2022 CAPACITY RISK (LOCAL)	
Level 1 Risk (No Local Verifiers, No Pipeline, No VB)	
1	Russia
2022 CAPACITY RISK (LOCAL)	
Level 2 Risk (No Local Verifiers, No Pipeline)	
2	Belgium
3	Georgia
4	Greece
5	Hungary
6	Japan
7	Lithuania
8	Moldova
9	Netherlands
10	North Macedonia

# What's coming next?

**Q3/ Q4**

## Piloting Mandatory Verifier and Verifier Body Admin Training

- Identification of training topics and potential low cost or cost-free training courses and training partners
- Potential topics include identification of discrimination/ harassment, identification of forced labor, root cause analysis for VB admins to respond to VOO-issued Corrective Action Requests, collective bargaining and freedom of association in China, triangulation of findings and proper Verification Data narrative

**Q2/ Q3**

## Preparation for Full Virtual Verification with launch of v1.5

- Update to Verification Protocol and Verifier Guidance - especially with inclusion of worker engagement technology (WE Tech) in the full virtual verification process
- Training for Verifiers and VB admins on requirements for execution of Full Virtual Verifications

# Process Oversight

# Process Oversight

## Goal:

Build trust in and credibility of SLCP and its data through comprehensive and rigorous processes that improve precision, consistency and integrity of SLCP verifications over time, resulting in quality verified data.

## Continuous Improvement

Feedback and partnerships

## Process Oversight

Assessing performance, quality and integrity of verification process

## Personnel

Establishing & maintaining qualified Verifier Bodies and Verifiers

## Verification Oversight Organization (VOO)

Overarching body responsible for ensuring integrity of SLCP verification and quality of verified assessment data.

### Personnel

- ✓ Verifier and Verifier Body (VB) qualification requirements
- ✓ Entrance exam and e-learning trainings for Verifiers
- ✓ Quality Assurance Manual
- ✓ VB Terms of Use
- ✓ Written VB Requirements
- ✓ Qualification process and requalification
- ✓ VB systems check
- ✓ Non-APSCA VB systems special Check

### Process Oversight

- ✓ VOO activities onsite and offsite
- ✓ VB scoring
- ✓ Quarterly Calibration Webinars
- ✓ Integrity Oversight Program
- ✓ Transparent Communication of Oversight Data via public QA site
- ✓ Ongoing support to Verifiers/ VBs with Helpdesk and online Q&A Knowledgebase

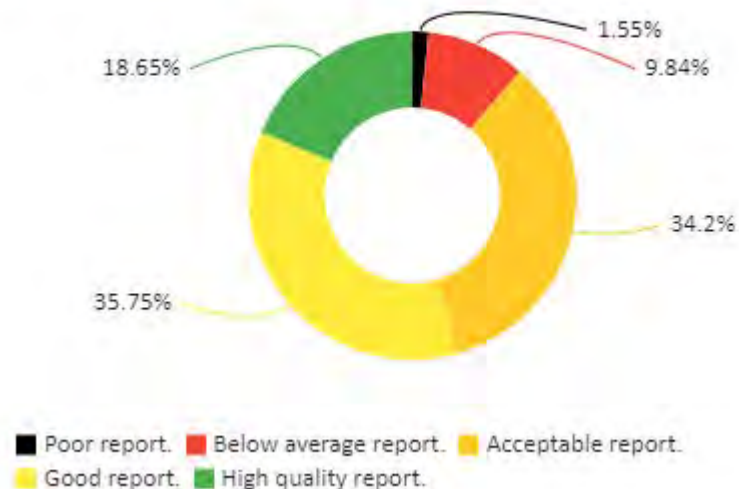

### Continuous Improvement

- ✓ Stakeholder QA program
- ✓ Feedback Mechanisms
- ✓ APSCA Collaboration
- ✓ Transparent Communication (public QA site)
- ✓ Verification Oversight Technical Advisory Committee

# Outcomes of 2021 QA activities

## Desktop Reviews

Distribution of Desktop Reviews Report Quality (Last Year)

**89%** of reports reviewed were found to be of sufficient quality (ranging from acceptable to high quality)  
Up from **88%** in 2020 & **76%** in 2019.

### Desktop Reviews 2021 Ops:

Average of **6.55** 'mistakes' found per report, down from 7.9 in 2020 and 13 in 2019

(SLCP report on average contains approx. 1500 data points)

### What happens if a report is found to be insufficient in quality?

- Corrective Action Request (CAR) issued to VB
- Feeds in to VB scores
- Significant issues result in report invalidation

# Outcomes of 2021 QA activities

## Shadow, Counter and Duplicate Verifications

### Duplicate

Duplicate Verification Findings	2020	2021
Max Variance	18%	26%
Average Variance	14%	13%

#### Main issues found:

- Verifier has different interpretation of laws and application
- Differing degrees of knowledge and experience between Verifiers

Process: Two VBs conduct a duplicate verification to insure consistency

### Shadow

#### Main issues in areas of:

- Time Management
- Procedure (e.g., explaining SLCP transparency; union/worker rep meeting before closing meeting)

Process: VOO representative joins an on-site verification as an observer

### Counter

#### Main issues found:

- Missing H&S issues during verification

Process: Onsite one-day verification conducted by VOO to conduct QA of key report aspects

# Process Oversight Activities

*New*

# Integrity Oversight Program

## Context:

- Individual Verifier performance is scored on a range of criteria including exam scores & QA outcomes
- Verifier scores feed into overall VB score, along with results of VB Management Checks

## Integrity Oversight Program

Based on the distribution of VB scores, the VOO determines a risk scale:

- Level 3 Risk (highest risk)
  - Level 2 Risk
  - Level 1 Risk (lowest risk)
- VBs are assessed against the risk scale and assigned a risk-rating based on their overall VB performance score.
  - Depending on the rating, a series of outlined actions take place, including mandatory additional QA activities paid for by the VB.
  - VBs will be suspended if they receive a level 3 risk status more than twice

*New*

# QA Manual updates on bribery reporting

## Bribery reporting enhanced

- Non-public communication
  - Via notes from VOO in Facility Profile on the Gateway only visible to subsequent VB
- Communication in the Gateway verified assessment report
  - Data visible to anyone with access to the report
  - VOO adds notes about the bribery incidence to the Assessment Information page of the Gateway report template; note identified as 'Verification Oversight Organization Alert'

# What's coming next?

Launch of form for Verifiers and VBs to report suspicions and unsubstantiated findings that VOO can attach to the facility profile as applicable to inform the next selected/ assigned VB

Starting to mine data to inform more efficient and streamlined selection of reports for desktop and onsite QA

How to further increase **transparency of VB performance**. Current measures include:

- Currently show Integrity Oversight Program outcomes on Verifier Body public page (probation status indicated, if applicable)
- Public dashboard shows average score of Verifiers and VBs

How to further encourage **honest data** from facilities in the self/ joint-assessment. Current measures include:

- Signatories commit to honest data in the signatory charter
- Users of the CAF sign ToU committing to provide honest data

# Continuous Improvement

# Continuous Improvement

# Stakeholder QA Program

The Stakeholder QA Program allows the Verification Oversight Organization (VOO) to use QA data gathered by brands and other stakeholders. There are 3 ways that data can be shared:

## Ad Hoc Feedback

Sharing ad hoc feedback with the VOO

## Conduct Shadow Verifications

Conducting a shadow verification and sharing the report with the VOO

## Standardized Data Review

Data in a standard digital format is shared with the VOO

# What's new: Updated communications on feedback mechanisms

- [Feedback on a specific Verified Assessment Report](#)

- [Form for complaints concerning verification](#)

- Contact [slcp@sumerra.com](mailto:slcp@sumerra.com) directly regarding ethics issue

- [Form for complaints concerning SLCP or VOO](#)

- Video on how to provide feedback ([English](#) | [Chinese](#))

- Find out more on how you can provide feedback [here](#).

# Conclusion

# 2021 Achievements & Learnings

## Achievements

- APSCA alignment: Implemented a new 'Provisional' status program with enhanced VB checks
- Implemented a new 'Integrity Program' with escalating discipline for low quality scores
- Piloted a new QA Stakeholder program to get additional quality data from other stakeholder participants
- Onboarded approximately 300 new Verifiers into the program
- Improved transparency/communication of Verifier capacity
- Added several 'risk' based factors to the VOO process for selection of verifications for QA

## Learnings

- There remain many opportunities for improvement in the consistency of verifications
- Opportunity to pilot additional Verifier training options
- As the data grows, there are opportunities to 'mine' this data for trends that can better focus our QA activities.
- Stakeholder QA program is expected to provide new insights into verification quality from stakeholder perspective.
